

MyTax Strategy

The tax risk landscape is continuously changing. As the expectation and focus of Inland Revenue increases, tax governance can no longer be considered in isolation from the wider business approach to risk and controls. As a result, senior management and audit committees should be considering how tax management aligns with the overall goals of the organisation.

What is MyTax Strategy?

MyTax Strategy is a technology enabled, interactive approach to providing you a snapshot of how your current tax function stacks up against Inland Revenue guidelines, and where you would like it to be. It combines the best of PwC's global methodology with technology and market expertise to allow seamless application to any size or type of organisation.

How we'll work with you

Identify – We'll work with you to identify key stakeholders in the organisation who should participate in the collaborative process. These people will be key to assessing your organisation.

Collaborate – Using our online framework we'll host a collaborative workshop to assess the current and desired state of the tax operating model and Tax Control Framework.

Report and recommend – We'll evaluate and report on the gap between your organisation's current and desired levels, summarising themes and providing targeted recommendations. This will include consideration of the latest in tax technology.

Further assistance – As required, we'll assist you with achieving the optimum Tax Control Framework and tax operating model and monitoring the ongoing implementation.

Features and benefits

- **Interactive** – Facilitate an interactive discussion, distilling relevant tax activity into manageable portions. We focus on how the tax function aligns with organisational strategy to maximise opportunities that arise out of business growth, acquisition, or transformational change.
- **Technology enabled** – Utilising a collaborative online tool to illustrate the strategic direction of the tax function and communicate this to stakeholders.
- **Adaptive** – Recognises that one size does not necessarily fit all by determining what is best for your organisation.
- **Globally recognised** – MyTax Strategy is inspired by the controls framework of COSO recognised both internationally and by Inland Revenue.
- **Expertise** – Using our expertise we will bring together the above to deliver a road map for your organisation.

MyTax Strategy gives you a snapshot of how your tax function stacks up against your organisations goals, and market expectation.
